

From July 15–17, 2025, the ASEAN+3 FETN Workshop on Rapid Response Teams in Urban Contexts took place in beautiful Hanoi, Vietnam

With support from the U.S. CDC, expert speakers from NCID Singapore, and distinguished guests from Vietnam's MOH and NIHE, participants from all 10 ASEAN countries and China came together to strengthen urban field epidemiology capacity.

We are grateful for this fruitful collaboration—may the shared knowledge continue to drive impact across the region!
